Revision Code: <u>A-2</u>		

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho	5/31/00		14		<input checked="" type="checkbox"/>
Coho	5/31/00		11		<input checked="" type="checkbox"/>
Coho	5/31/00		7		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: On May 31, 2000 minnow traps were set at three locations on tributaries to Porcupine Creek. The areas trapped for fish were located where the road will be crossing. Upper extent was not evaluated nor were side tributaries to these tribs. We will be continuing these surveys at a future date. The traps were set from east to west (look at attached map). The first trap was set for 12 minutes and retrieved 14 coho. The second trap was set for 8 minutes and 11 coho were identified. The third trap was set for 8 minutes and 7 coho were identified.

Name of Observer (please print):

Linda Speerstra FT IV

Signature:

Linda Speerstra

Date: 10/13/00

Address:

304 Lake St. Rm. 103

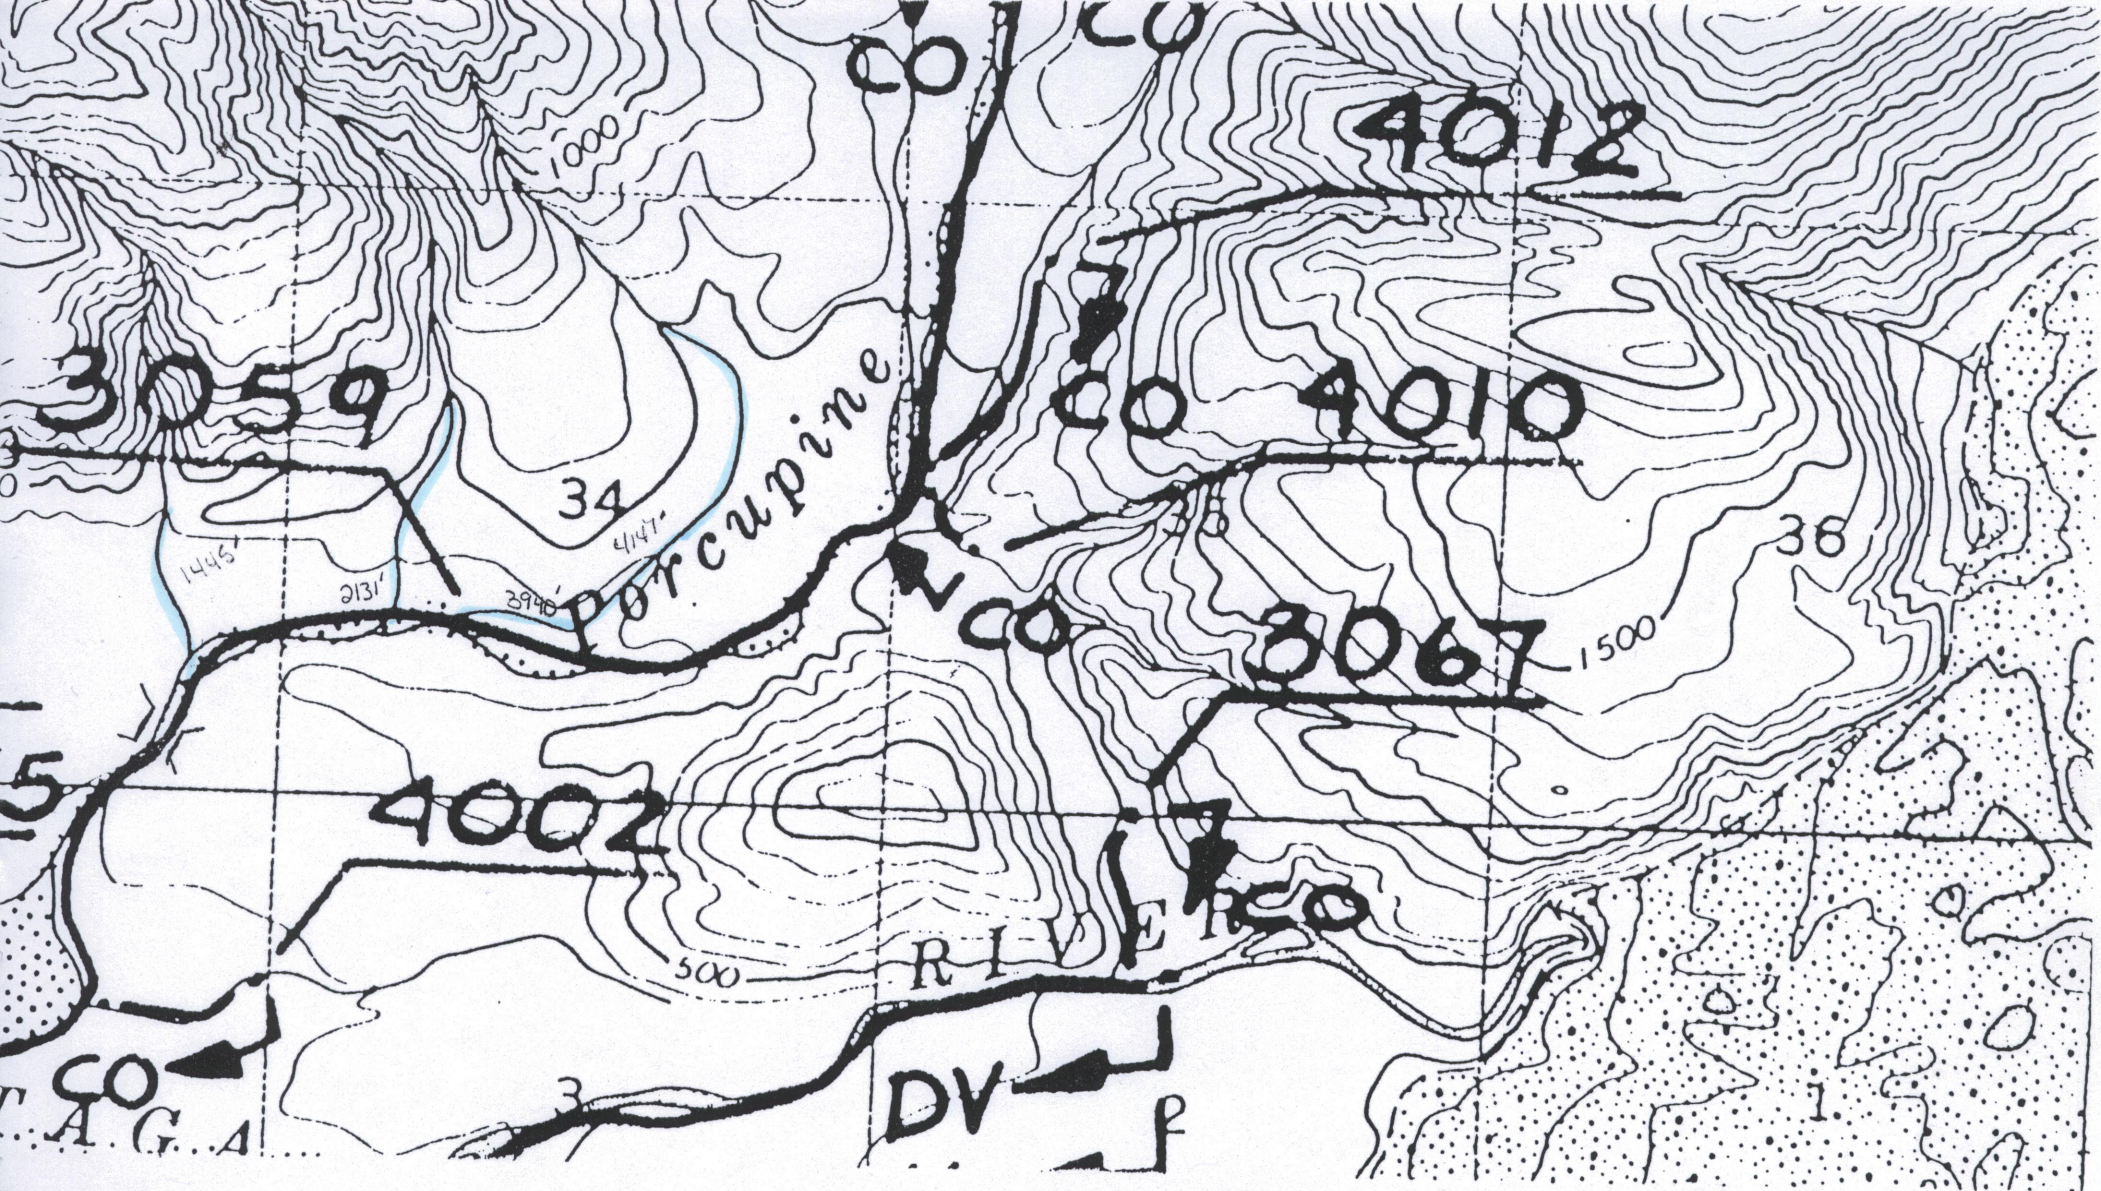

Sitka, AK 99835

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist:

Phil Spooner
